Position Overview:

Renewable Energy and Sustainability Intern will contribute to the planning, implementation, and monitoring of renewable energy, clean cooking, and energy efficiency projects and initiatives. This position is ideal for a master's student or recent Masters graduate in renewable or sustainable energy who is eager to gain practical experience in project development, data analysis, and stakeholder engagement within the clean energy sector.

Key Responsibilities:

- Support the design, execution, and evaluation of renewable energy and energy efficiency projects.
- Contribute to conduct research and perform data analysis on energy technologies, market trends, and policy frameworks.
- Assist in the preparation of technical reports, feasibility studies, and project proposals.
- Support project through data collection and performance analysis.
- Contribute to stakeholder engagement activities, including meetings, workshops, and partnership coordination.
- Assist to prepare presentations, progress reports, and documentation for internal and external audiences.
- Provide administrative and logistical assistance to project teams as required.

Qualifications:

- Currently pursuing or recently completed a Master's degree in Renewable Energy, Sustainable Energy Systems, Environmental Engineering, or a related discipline.
- Solid understanding of renewable energy technologies and energy policy frameworks.
- Proven research, analytical, and technical writing abilities.

- Proficiency in Microsoft Office (Excel, PowerPoint, Word); experience with energy modelling software is an advantage.
- Strong organizational, communication, and interpersonal skills.
- Ability to work both independently and collaboratively in a multidisciplinary environment.
- Demonstrated commitment to sustainability and advancing the clean energy transition.
